# Chapter 1

## Introduction

### 1.1 Purpose

The purpose of this document is to give a detailed description of the requirements for the “Project Hibernate” software. It will illustrate the purpose and complete declaration for the development of system. It will also explain system constraints, interface and interactions with other external applications. This document is primarily intended to be proposed to a customer for its approval and a reference for developing the first version of the system for the development team. This document is written according to the standard [1].

### 1.2 Scope

The “Project Hibernate” software is an application which help accountants to manage practices.

The application should be available to use from any browser.

Furthermore, the software needs to query a Database to fetch and display results.

### 1.3 Definitions, acronyms, and abbreviations

Term	Definition
IEEE	Institute of Electrical and Electronic Engineers

## Chapter 2

# Overall description

This section will give an overview of the whole system. The system will be explained in its context to show how the system interacts with other systems and introduce the basic functionality of it. It will also describe what type of stakeholders will use the system and what functionality is available for each type. At last, the constraints and the assumptions for the system will be presented.

## Chapter 3

# Specific requirements

## Chapter 4

# Functional requirements

## Chapter 5

# Prioritization and Release Plan
